

AI Resume Analysis Report

ATS Score: 85%

Detected Skills:

- Python
- Java
- SQL
- HTML
- CSS
- AI

Missing Skills:

- Machine Learning

Based on the provided resume and job description (which is not provided), I'll analyze the resume and give general feedback. Please note that the job description is missing, so I'll provide general suggestions.

****Assumptions:****

Since the job description is not provided, I'll assume a general AI/ Data Science job description that requires skills in programming languages, machine learning, data analysis, and web development.

****Analysis:****

1. ****ATS Score:**** 70-80%

The resume is well-structured, and the candidate has provided relevant information about their education, skills, projects, and certifications. However, the resume could be improved with more

specific details about their experience and achievements.

2. **Matching Skills:**

The candidate has mentioned the following skills that are relevant to AI/ Data Science:

- * Programming languages: Python, Java (basics)
- * Technical Skills: ML Basics, NumPy, Pandas, ScikitLearn, Data Virtualization
- * DataBase: SQL
- * Development Tools: Git & GitHub, VS Code, StreamLit
- * Projects: AI Resume Analyzer, AI Chatbot

3. **Missing Skills:**

Based on general AI/ Data Science job requirements, the candidate may be missing:

- * Deep learning frameworks (e.g., TensorFlow, PyTorch)
- * Natural Language Processing (NLP) libraries (e.g., NLTK, spaCy)
- * Data visualization tools (e.g., Matplotlib, Seaborn)
- * Cloud platforms (e.g., AWS, Google Cloud)
- * Experience with big data technologies (e.g., Hadoop, Spark)

4. **Suggestions:**

To improve the resume and increase the chances of passing through an ATS (Applicant Tracking System), the candidate could:

- * Add more specific details about their projects, including the technologies used, challenges faced, and achievements.
- * Include relevant coursework or academic projects that demonstrate their skills in AI/ Data Science.
- * Mention any relevant research experience, publications, or presentations.
- * Consider adding a summary or professional summary section to highlight their key skills and

experience.

* Tailor the resume to the specific job description by using keywords from the job posting.

Please provide the job description for a more accurate analysis.
